#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 16, 2007 has been entered.

### **Claim Rejections - 35 USC § 102**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by the Herold (US Patent Publication Number 20020169363), previously cited by examiner on 892.

Herold discloses a retractor blade assembly comprising a fixed blade, e.g. 18, having a tissue engaging segment extending along a longitudinal axis and an adjustable blade, e.g. 17, operatively coupled to the fixed blade and linearly adjustable relative to the fixed blade parallel to the longitudinal axis of the tissue engaging segment of the fixed blade, the adjustable blade includes a rectilinear flexible tab, e.g. 15, wherein the flexible tab is movable between a first position in which the tab is generally co-planar to

Art Unit: 3733

the adjustable blade and a second position in which the tab is oriented generally transverse to the adjustable blade (see figures 2-4 and paragraph 0019). The flexible tab is biased to the first position, and the flexible tab is configured to move away from the fixed blade when moved to the second position (see figures 2-4 and paragraph 0019). In addition, a distal portion of the flexible tab is coupled to and formed from the adjustable blade, and the flexible tab is pivotable about the distal portion between the first and second positions (see figures 2-4 and paragraphs 0019 and 0020).

#### ***Allowable Subject Matter***

Claims 7, 8 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 11-16 are allowed.

#### ***Response to Arguments***

Applicant's arguments with respect to claims 1-16 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO 892 for art cited of interest
